

Name: Abhinav Jain

Roll no- 19ucs240

Started with my introduction. Told about my achievements in competitive and development. Then they started asking about my projects and the very fundamentals of it. For example, in a project of online compiler, they went on to ask about the compiler syntactical and semantic error, can a compiler be made without knowledge of HLL. In a project using SQL database, asked about the difference in noSQL and sql databases. Need good knowledge of the computer fundamentals used in the project. No coding question asked.

Name: Shaurya Sethi

Roll No.: 19ucs137

Resume based interview,

Favorite DS- questions related to that, when can you use them,

Project based

Name: Manish Porwal

Roll No.: 19ucs184

Project related questions and some questions on networking. Questions on JDBC and database and some part was from computer networking.

Name: Lalit Tilwani

Roll No.: 19ucc065

Completely resume based interview, First I was asked about my projects and internship, Questions about sass, threads, kotlin. Some question on react and its working, responsive UI, MVVM architecture and how it improves code quality. Some questions on gitlab.

Name : Keshav Paliwal

Roll No. 19ucs158

Interview experience :

Interviewers asked to introduce myself

Asked about the thing in which i am the most interested, and the further discussions were based on it.

Questions were primarily based on the technologies mentioned in the resume.

Name : Nitish Kumar Gupta

Roll No. 19ucc131

Interview experience :

They asked me about my project. How does a website work, explain the entire process. How I designed my frontend and what were the problems I faced while making it. They then asked how will I make a backend for my website? They also asked about difference in python and java. Overall experience was good and the recruiters were friendly.

Name :Keshav Maheshwari

Roll No. 19ucs060

Interview experience :

Interview questions was based on resume only. The questions were based on projects only. The recruiters were friendly. They asked in which path I want to pursue my career. They asked me what basically NLP(Natural Language Processing) is. They asked me about the first round interview question.

Name- Abhinav Agarwal

Roll- 19ucs254

Dr. Jadish asked me to introduce myself and after I was done introducing myself the panel members started asking me questions regarding the introduction I gave and the resume only. More specifically, questions were from the projects and internships I mentioned. Like what work you did for the internship or the projects, what technologies you worked on and then some questions on the technologies I mentioned.

Name- Daksh Khandelwal

Roll- 19ucs052

They asked questions based on the resume only, the skill set I mentioned and the projects I listed on my resume. For example, they asked me what would happen if a person login with two systems using the same account at the same time, how will your portal handle this situation.

Name- Saatvik Singh

Roll No - 19ucs133

They asked questions on the projects that were mentioned in the resume. Other than that, as I was applying for a data science position, questions related to that were asked. Algorithms related to data science and processes regarding data analytics were asked.

Name : Sumit Ailani

Roll No. 19ucs255

Interview experience : It started with a quick introduction and asked about the ambitions regarding becoming a product engineer. Asked about the skill set and about the similar tech stacks you have worked on already. Moved on to projects, and asked them in detail (loopholes too, application of what you learnt from the project). Moved on to Database manipulation, then the difference between SQL/Nosql.

Name : Shreyansh Jain

Roll No. 19ucs003

Interview experience : It started with the quick introduction. After introduction they asked about the project and they asked all the tech stacks (javascript,socket io,Node js) related questions .

Name : Shruti Gautam

Roll No. : 19ucc090

Interview experience : Resume based questions. Analyzed the thought process. Questions related to testing and libraries.

Name: Mohit Goyani

Roll No. : 19ucc114

Interview experience: It started with an introduction followed by WebSockets Question, further asked questions about the project and its implementation on ML Code, asked about multi-threading and reasons to use it. Asked about queues and linked lists and its practical implementation, and its uses and it was followed by redis server. Further asked about blockchain and its linkage with linked list.

Name : Tanay Makharia

Roll No. : 19ucs122

Interview experience : It started with quick introduction. Asked about the main part of skills. Difference between structure and classes. Oops related question. Asked about the project in detail(frontend and backend). Asked about the database (SQL related question).

Name : Pratham Khandelwal

Roll No.19ucs094

Interview experience : It all started with them asking about my “about me” and then they questioned about my projects. They questioned each and every detail of the project like for my bot they asked what all technologies I used and for my full stack projects they questioned about java concepts , how the gui was made , ERD diagram for a particular task etc.

Name : Harsh Chauhan

Roll No. 19ucs034

Interview experience : Interview was based on resume only. They made sure I know every data and implementation of the project.

Name : Yash Jindal

Roll No. 19cus055

Interview experience : Interview is mainly focused on resume and there was a deep discussion on the projects mentioned in the resume.

Name: Ankush Dutt

Roll No: 19ucs172

Interview experience: Interviewers only asked questions related to resume and there was deep discussion on web projects and technologies used in the projects.
Asked questions about Docker.

Name: Aakansha Modi

Roll No: 19ucs083

Interview Experience: Started with the introduction, asked about one of the project and its explanation, asked about the databases used in the project and the difference between SQL and NoSQL, then the difference between HTML4 & 5. Asked about the skill set in detail of the candidate.

Name: Raj Chordia

Roll No: 19ucs220

Interview Experience: Interviewers asked about one of the projects. He is a TA in OS ,asked about how the linux kernel connects the user interface.

Graph scheduling, discussion on rr scheduling and FCFS. Greedy algorithm, questions about term paper, largest degree ordering algorithm.

Name:ashutosh bajpai

Roll No: 19uec038

Interview Experience: Started with the basic intro ,then asked about the projects: how does api work,which platform they have used in backend, which language can be used in frontend. CGPA related questions.

They have surprisingly asked question from the core electronics :zener diode , LDR
And a few HR based questions.

Name:utkarsh mathur

Roll No: 19uec026

Interview Experience : Started with the intro ,the questions were based on the project: Header files, what and why have you used the function in the projects ,asked how API works, and whether you know node js or not

Asked about whether you are interested in ML, and asked about markup language.

Name: Sneha jain

Roll No: 19ume023

Interview Experience: asked a lot of question about the mechanical core :carnot engine core , what is your best subject in mech ;TQM :asked one question,

C++ vs java, c++ vs c , project based : database connections , requirement of connections ,
oops class vs object need

Name:himanshu goyal

Roll No: 19ucc006

Interview Experience: started with the introduction , then directly jumped over to the projects , segmentation sentiment analysis , a few basic questions from machine learning : KNN , decision trees and asked how these can be implemented and where we should use them.

Name: Hitesh Goyal

Roll No: 19uec023

Interview Experience:

Asked about structures and classes , differences between them . What are data structures , what is stored in a data structure, what all data structures I know.
asked about Projects but mainly Data structure classes and objects questions were asked like what is struct, in which language do use it and syntax.
Why the initial coding test was finished in only 40 mins and other branch related questions.
Overall experience was good.

Name : Anshul Garg

Roll No: 19ucc006

Interview Experience:

Started with Introduction then asked questions by reading the resume .
Questions like:
What are Data structure
What are Algo
Is TSP an algo or problem
Difference between Html and css
Then they asked if the projects were made individually or in groups. Then they asked about contribution to the project.

Name:SHIVANG SHARMA

Roll No: 19uec004

Interview Experience:

First interviewers read the resume then asked questions related to ece branch like microcontroller, micro processor and Address port no.
Then they asked about interests and what topics are you confident in and in data structure what have you done till now
What are your future plans and we will be waiting for you next time, Please be more prepared by then and learn everything you write in your resume even if it is half blank.
Hope to see you next time with same bright personality

Name:Suhem Parashar

Roll No: 19uec004

Interview Experience:

Started by telling about himself and his story that how he got D grade in CP and the very next year he got a global rank of 206 in cp.

Interviewers asked that Array will be cakewalk for you and asked some questions related to arrays and queues .

Then they asked questions like:

What is indexing why does it start with 0

Difference between null and null pointer

Then they asked about projects and why he used mongo db, why not sql

Difference between mongo bd and sql

Which authentication have he used, cookies and jwb token.

Overall everything went fine except for that pointer question.

Name:Tithi Agarwal

Roll No: 19uec131

Interview Experience:

Interview started with an introduction where she told about her coding experience and that she tried web d, but it was not that interesting then she told about her responsibilities and achievements in dance club and mentioned some points of PPT.

Then they asked questions like :

- 1.What do you know about development
- 2.Is c basic , why java is not basic
3. What are Oobs and its basic definition
4. Difference between Algo and code and what is code .
5. What if algo is bad and how will you optimize it
6. What is practical implication of C
7. Is java learnable without C
8. Space and time complexity
9. Then he asked if any other languages you know
- 10 .Can you write an algo for fibonacci

Name : Ankush Agrawal

Roll No. 18dcs011

Interview :

Asked about Dual degree mtech related questions,

Mainly research oriented.

Rest all was interview based on resume.

Name:Sheoran Narender Sagar

Roll No: 19ucc071

Interview Experience:

Started with Introduction, asked about Project dates in resume.

What is your Profile datascience

Deep learning or Ip

Projects related question like which data set used in projects

Preprocessing in a data set . How modeling structure was made

Same basic question in chat box project.

Basic machine learning questions

Name :Shivam Shukla

Roll no :19ucs040

Interview Experience:

Asked why there is no project in resume , then they asked about work experience in tech field and questions regarding his startup

Diff btw windows and linux.

Why linux is better than windows

Little bit about Devops -> Ansible vs Puppet -> Asked me about my drop years ->
